

**INSPECTION
(F-16 C/D)**

- 1. Objective.** This standard is published as prescribed in AFI 38-201, *Determining Manpower Requirements*. This Air National Guard Manpower Standard (ANGMS) quantifies the full-time manpower required to accomplish the tasks described in the work center description for varying levels of workload volume.
- 2. Authority.** Air National Guard Regulation 66-14, *Maintenance Management*, 13 July 1988, contains policy and procedural guidance for the Inspection work center. This ANGMS has been developed in accordance with procedures contained in AFPAM 38-208V1, *Air Force Management Engineering Program (MEP) Processes*, formerly AFR 25-5.
- 3. Applicability.** Applies to all ANG Fighter Wings and Groups possessing F-16 C/D mission design series (MDS) aircraft. This standard applies to peacetime operations only.
- 4. Standard Data:**
 - a. Classification. Type II.
 - b. Approval Date. 15 June 1994.
 - c. Man-hour Data Source. Operational Audit method (historical record and technical estimate techniques).
 - d. Standard Man-hour Equation. $Y = 398.6 + 1.633X$.
 - e. Workload Factor:
 - (1) Title. A Programmed Flying Hour.
 - (2) Definition. The average monthly programmed flying hours for ANG F-16 C/D MDS aircraft.
 - (3) Source. USAF Program Document, Volume II, maintained by NGB/FM.
- 5. Application Instructions:**
 - a. The valid man-hour range for this ANGMS is 707.17 through 1389.85.
 - b. This ANGMS is appropriate for use with all peacetime civilian man-hour availability factors.
 - c. Determine the whole manpower requirements for this work center by substituting the appropriate workload value described in paragraph 4e for the X-value in the man-hour equation shown in paragraph 4d. The resultant number will be divided by the current civilian man-hour availability factor which will produce fractional manpower requirements. Use the fractional manpower table provided by ANGRC/XPME to determine total whole-man requirements.
 - d. Refer to attachment 2, AF Form 1113, Standard Manpower Table, to determine the specific Air Force specialties.
- 6. Statement of Conditions.** This standard reflects requirements to support a 200-flying hour interval between phases for each F-16 aircraft authorized. The conditions listed below had no effect on the development of this standard, nor will they affect future applications. Analyses of these levels of service indicate no manpower impact:
 - a. Minimum response rates.
 - b. Minimum manpower levels.
 - c. Safety Considerations.
 - e. Aircraft turn-around time.
 - f. Length of waiting periods.

- g. Levels of backlog.
- h. Hours of operation.
